Poland

### **Reference letter**

NAFA POLSKA Sp. z o.o., located in the Industrial Zone in Łozienica, expresses its appreciation for the company CoBouw Poland Sp. zo.o. with regard to the construction of it's new warehouse and production hall (7300 sq m in total) with social office building (1000 sq m in total).

CoBouw Polska has performed the general execution of the investment and complex branch design. The company took care of most essential permits, as well as the complete hiring and coordination of all subcontractors. This has resulted in meeting all time limits and staying within the planned budgets plans as originally offered.

Because CoBouw managed to build the facility in just 5 months (!), our company was able to use the new building in time before our high-season started. Additionally, the inspection and after service terms were met satisfactory.

The CoBouw staff and workers can be described as dedicated and well trained.

Work that was made by CoBouw can be characterized by the modern design and using materials and technology that fulfill the latest requirements.

With full responsibility we recommend CoBouw as a reliable and professional full service construction company.

We would like to highly recommend CoBouw Poland Sp. z o. o. as a reliable and professional partner in the realization of property investment.

Yours Sincerely,

Sebastian Jansen, Managing Director
